Subject Index

Volume 63

1-β-D-arabinofuranosylcytrosine, hydroxyurea, 2′-deoxyguanosine, gastric carcinoma, drug combination, 221
2′-Deoxyguanosine, 1-β-D-arabinofuranosylcytrosine, hydroxyurea, gastric carcinoma, drug combination, 221
[14-^{14}C]Doxorubicin, doxorubicin, Adriamycin, anthracycline, Chinese hamster lung, fibroblast cell lines, V-79 and LZ, 109
Aberrant crypts, cholesterol, cell proliferation, colon carcinogenesis 249
Aberrant crypts, flaxseed, lignans, colon carcinogenesis, cell proliferation, 159
Adriamycin, doxorubicin, anthracycline, [14-^{14}C]-doxorubicin, Chinese hamster lung, fibroblast cell lines, V-79 and LZ, 109
O^6-Alkylguanine-DNA-alkyltranserase, imidazotetrazines, temozolomide, 3-methyladenine-DNA-glycosylase, 151
Alpha-fetoprotein, glycosylation, hepadnavirus, hepatocellular carcinoma, woodchuck, 93
Anthracycline, doxorubicin, Adriamycin, [14-^{14}C]-doxorubicin, Chinese hamster lung, fibroblast cell lines, V-79 and LZ, 109
Anti-oxidants, cis-unsaturated fatty acids, free radicals, tumor cells, lipid peroxidation, superoxide anion, 189
Antioxidants, quercetin, flavonoids, DNA damage, lipid peroxidation, oxygen radicals 237
Antitumorigenesis, garlic, *S*-allyl cysteine, neuroblastoma, 211
Antitumour, *Nigella sativa*, Ehrlich ascites carcinoma, Dalton's lymphoma ascites, Sarcoma-180, 41
Arylation, quinones, oxidative stress, cytosolic Ca^{2+}, DNA strand breaks, 47
Azoxymethane, voluntary exercise, rat hepatocarcinogenesis, 67

BaP-DNA adducts benzo[*a*]pyrene, benzo[*e*]pyrene, co-carcinogenesis, 229
Benzo[*a*]pyrene, benzo[*e*]pyrene, co-carcinogenesis, BaP-DNA adducts 229
Benzo[*e*]pyrene, benzo[*a*]pyrene, co-carcinogenesis, BaP-DNA adducts 229
Bladder cancer, schistosomiasis, environmental alkylating agents, DNA damage and repair, urinary bacterial infection, *ras* oncogenes, 171
Breast, conjugated linoleic acid (CLA), β-carotene, melanoma, colorectal, cancer cells, 125
Breast diethylstilbestrol (DES), hormone sensitivity, sex hormones, estrogen, 117
Buthionine sulfoximine Melanoma tyrosinase cysteaminylphenol phenylthiourea 73

C-*fes* tyrosine protein kinase, differentiation, colony stimulating factor, GM-CSF, phosphorylation, 15
Cancer cells, conjugated linoleic acid (CLA), β-carotene, melanoma, colorectal, breast, 125
β-Carotene, conjugated linoleic acid (CLA), melanoma, colorectal, breast, cancer cells, 125
CD4$^-$ carcinoma cell lines, HIV-1 infectivity, HIV-HPV coinfection, 23
Cell migration, protein kinase C, glioma, 167
Cell proliferation, cholesterol, aberrant crypts, colon carcinogenesis 249
Cell proliferation, flaxseed, lignans, colon carcinogenesis, aberrant crypts, 159
Cellulose, diet, neoplasia, organochlorines, reproduction, promotion, 83
Cervical carcinoma, homozygosity, chromosome 17, 243
Chinese hamster lung, doxorubicin, Adriamycin, anthracycline, [14-^{14}C]doxorubicin, fibroblast cell lines, V-79 and LZ, 109
Cholesterol, aberrant crypts, cell proliferation, colon carcinogenesis 249
Chromosome 17, homozygosity, cervical carcinoma, 243
Cis-unsaturated fatty acids, free radicals, tumor cells, lipid peroxidation, superoxide anion, anti-oxidants, 189
Cisplatin, leukocytes, pRSVcat, electroporation, DNA repair, 143
Co-carcinogenesis, benzo[*a*]pyrene, benzo[*e*]pyrene, BaP-DNA adducts 229
Colon cancer, colon suppression, protease inhibitors, 135

Colon cancer, differentiation, TGF-β, sodium butyrate, growth inhibition, 33
Colon carcinogenesis, flaxseed, lignans, aberrant crypts, cell proliferation, 159
Colon carcinogenesis cholesterol, aberrant crypts, cell proliferation, 249
Colon suppression, colon cancer, protease inhibitors, 135
Colony stimulating factor, tryrosine protein kinase, differentiation, GM-CSF, phosphorylation, c-*fes* 15
Colorectal, conjugated linoleic acid (CLA), β-carotene, melanoma, breast, cancer cells, 125
Conjugated linoleic acid (CLA), β-carotene, melanoma, colorectal, breast, cancer cells, 125
Cysteaminylphenol Melanoma tyrosinase buthionine sulfoximine phenylthiourea 73
Cytosolic Ca^{2+}, quinones, oxidative stress, arylation, DNA strand breaks, 47

Dalton's lymphoma ascites, antitumour, *Nigella sativa*, Ehrlich ascites carcinoma, Sarcoma-180, 41
Diet, cellulose, neoplasia, organochlorines, reproduction, promotion, 83
Differentiation, TGF-β, sodium butyrate, colon cancer, growth inhibition, 33
Differentiation, tryrosine protein kinase, colony stimulating factor, GM-CSF, phosphorylation, c-*fes* 15
DNA damage, quercetin, antioxidants, flavonoids, lipid peroxidation, oxygen radicals 237
DNA damage and repair, schistosomiasis, bladder cancer, environmental alkylating agents, urinary bacterial infection, *ras* oncogenes, 171
DNA repair, cisplatin, leukocytes, pRSVcat, electroporation, 143
DNA strand breaks, quinones, oxidative stress, arylation, cytosolic Ca^{2+}, 47
DNA- and tRNA-binding, peroxidase, *N*-nitrosamines, 53
Doxorubicin, Adriamycin, anthracycline, [14-^{14}C]-doxorubicin, Chinese hamster lung, fibroblast cell lines, V-79 and LZ, 109
Drug combination, 1-β-D-arabinofuranosylcytrosine, hydroxyurea, 2′-deoxyguanosine, gastric carcinoma, 221

Ehrlich ascites carcinoma, antitumour, *Nigella sativa*, Dalton's lymphoma ascites, Sarcoma-180, 41
Ehrlich ascites tumor, tumor necrosis factor, zymosan, lipopolysaccharide, sulindac, mannoheptulose, 7
Electroporation, cisplatin, leukocytes, pRSVcat, DNA repair, 143
Environmental alkylating agents, schistosomiasis, bladder cancer, DNA damage and repair, urinary bacterial infection, *ras* oncogenes, 171
Eosophagus, nitrosamine, nitrosurea, rat, nasal tumors, hamster, 101
Estrogen, hormone sensitivity, breast diethylstilbestrol (DES), sex hormones, 117

Fibroblast cell lines, doxorubicin, Adriamycin, anthracycline, [14-^{14}C]doxorubicin, Chinese hamster lung, V-79 and LZ, 109
Flavonoids, quercetin, antioxidants, DNA damage, lipid peroxidation, oxygen radicals 237
Flaxseed, lignans, colon carcinogenesis, aberrant crypts, cell proliferation, 159
Fluorescence quenching, mucin core related peptide, polymorphic epithelial mucins, 199
Free radicals, cis-unsaturated fatty acids, tumor cells, lipid peroxidation, superoxide anion, anti-oxidants, 189

Garlic, antitumorigenesis, *S*-allyl cysteine, neuroblastoma, 211
Gastric carcinoma, 1-β-D-arabinofuranosylcytrosine, hydroxyurea, 2′-deoxyguanosine, drug combination, 221
Glioma, protein kinase C, cell migration, 167
γ-Glutamyltranspeptidase-positive foci, stanozolol, rat liver, 203
Glycosylation, alpha-fetoprotein, hepadnavirus, hepatocellular carcinoma, woodchuck, 93
GM-CSF, tryrosine protein kinase, differentiation, colony stimulating factor, phosphorylation, c-*fes* 15
Growth inhibition, differentiation, TGF-β, sodium butyrate, colon cancer, 33

Hamster, nitrosamine, nitrosurea, rat, nasal tumors, eosophagus, 101
Hepadnavirus, alpha-fetoprotein, glycosylation, hepatocellular carcinoma, woodchuck, 93
Hepatocellular carcinoma, alpha-fetoprotein, glycosylation, hepadnavirus, woodchuck, 93
HIV-1 infectivity, $CD4^-$ carcinoma cell lines, HIV-HPV coinfection, 23
HIV-HPV coinfection, $CD4^-$ carcinoma cell lines, HIV-1 infectivity, 23
Homozygosity, chromosome 17, cervical carcinoma, 243
Hormone sensitivity, breast diethylstilbestrol (DES), sex hormones, estrogen, 117
Hydroxyurea, 1-β-D-arabinofuranosylcytrosine, 2′-deoxyguanosine, gastric carcinoma, drug combination, 221

Imidazotetrazines, temozolomide, 3-methyladenine-DNA-glycosylase, O^6-alkylguanine-DNA-alkyltranserase, 151
Immunohistochemistry, monoclonal antibody, neuroendocrine, lung cancer, 61

Leukocytes, cisplatin, pRSVcat, electroporation, DNA repair, 143
Lignans, flaxseed, colon carcinogenesis, aberrant crypts, cell proliferation, 159
Lipid peroxidation, cis-unsaturated fatty acids, free radicals, tumor cells, superoxide anion, anti-oxidants, 189
Lipid peroxidation, quercetin, antioxidants, flavonoids, DNA damage, oxygen radicals 237
Lipopolysaccharide, tumor necrosis factor, zymosan, Ehrlich ascites tumor, sulindac, mannoheptulose, 7
Lung cancer, monoclonal antibody, neuroendocrine, immunohistochemistry, 61

Mannoheptulose, tumor necrosis factor, zymosan, lipopolysaccharide, Ehrlich ascites tumor, sulindac, 7
Melanoma, conjugated linoleic acid (CLA), β-carotene, colorectal, breast, cancer cells, 125
Melanoma tyrosinase cysteaminylphenol buthionine sulfoximine phenylthiourea 73
Membrane potential, soium L-ascorbate, rat urinary bladder, 1
3-Methyladenine-DNA-glycosylase, imidazotetrazines, temozolomide, O^6-alkylguanine-DNA-alkyltranserase, 151
Monoclonal antibody, neuroendocrine, lung cancer, immunohistochemistry, 61
Mucin core related peptide, fluorescence quenching, polymorphic epithelial mucins, 199

N-Nitrosamines, peroxidase, DNA- and tRNA-binding, 53
Nasal tumors, nitrosamine, nitrosurea, rat, eosophagus, hamster, 101
Neoplasia, cellulose, diet, organochlorines, reproduction, promotion, 83
Neuroblastoma, antitumorigenesis, garlic, *S*-allyl cysteine, 211
Neuroendocrine, monoclonal antibody, lung cancer, immunohistochemistry, 61
Nigella sativa, antitumour, Ehrlich ascites carcinoma, Dalton's lymphoma ascites, Sarcoma-180, 41
Nitrosamine, nitrosurea, rat, nasal tumors, eosophagus, hamster, 101
Nitrosurea, nitrosamine, rat, nasal tumors, eosophagus, hamster, 101

Organochlorines, cellulose, diet, neoplasia, reproduction, promotion, 83
Oxidative stress, quinones, arylation, cytosolic Ca^{2+}, DNA strand breaks, 47
Oxygen radicals quercetin, antioxidants, flavonoids, DNA damage, lipid peroxidation, 237

Peroxidase, *N*-nitrosamines, DNA- and tRNA-binding, 53
Phenylthiourea Melanoma tyrosinase cysteaminylphenol buthionine sulfoximine 73
Phosphorylation, tryrosine protein kinase, differentiation, colony stimulating factor, GM-CSF, c-*fes* 15
Polymorphic epithelial mucins, fluorescence quenching, mucin core related peptide, 199
Promotion, cellulose, diet, neoplasia, organochlorines, reproduction, 83
Protease inhibitors, colon cancer, colon suppression, 135
Protein kinase C, cell migration, glioma, 167
PRSVcat, cisplatin, leukocytes, electroporation, DNA repair, 143

Quercetin, antioxidants, flavonoids, DNA damage, lipid peroxidation, oxygen radicals 237
Quinones, oxidative stress, arylation, cytosolic Ca^{2+}, DNA strand breaks, 47

ras oncogenes, schistosomiasis, bladder cancer, environmental alkylating agents, DNA damage and repair, urinary bacterial infection, 171
Rat, nitrosamine, nitrosurea, nasal tumors, eosophagus, hamster, 101
Rat hepatocarcinogenesis, voluntary exercise, azoxymethane, 67
Rat liver, stanozolol, γ-glutamyltranspeptidase-positive foci, 203
Rat urinary bladder, soium L-ascorbate, membrane potential, 1
Reproduction, cellulose, diet, neoplasia, organochlorines, promotion, 83

S-Allyl cysteine, antitumorigenesis, garlic, neuroblastoma, 211
Sarcoma-180, antitumour, *Nigella sativa*, Ehrlich ascites carcinoma, Dalton's lymphoma ascites, 41
Schistosomiasis, bladder cancer, environmental alkylating agents, DNA damage and repair, urinary bacterial infection, *ras* oncogenes, 171
Sex hormones, hormone sensitivity, breast diethylstilbestrol (DES), estrogen, 117
Sodium butyrate, differentiation, TGF-β, colon cancer, growth inhibition, 33

Soium L-ascorbate, membrane potential, rat urinary bladder, 1
Stanozolol, γ-glutamyltranspeptidase-positive foci, rat liver, 203
Sulindac, tumor necrosis factor, zymosan, lipopolysaccharide, Ehrlich ascites tumor, mannoheptulose, 7
Superoxide anion, cis-unsaturated fatty acids, free radicals, tumor cells, lipid peroxidation, anti-oxidants, 189

Temozolomide, imidazotetrazines, 3-methyladenine-DNA-glycosylase, O^6-alkylguanine-DNA-alkyltransferase, 151
TGF-β, differentiation, sodium butyrate, colon cancer, growth inhibition, 33
Tryrosine protein kinase, differentiation, colony stimulating factor, GM-CSF, phosphorylation, c-*fes* 15
Tumor cells, cis-unsaturated fatty acids, free radicals, lipid peroxidation, superoxide anion, anti-oxidants, 189
Tumor necrosis factor, zymosan, lipopolysaccharide, Ehrlich ascites tumor, sulindac, mannoheptulose, 7
Tyrosinase Melanoma cysteaminylphenol buthionine sulfoximine phenylthiourea 73

Urinary bacterial infection, schistosomiasis, bladder cancer, environmental alkylating agents, DNA damage and repair, *ras* oncogenes, 171

V-79 and LZ, doxorubicin, Adriamycin, anthracycline, [14C-14]doxorubicin, Chinese hamster lung, fibroblast cell lines, 109
Voluntary exercise, azoxymethane, rat hepatocarcinogenesis, 67

Woodchuck, alpha-fetoprotein, glycosylation, hepadnavirus, hepatocellular carcinoma, 93

Zymosan, tumor necrosis factor, lipopolysaccharide, Ehrlich ascites tumor, sulindac, mannoheptulose, 7
